

Mining Rights Protocol (MRP)

Ergo Hack 9 Presentation

Presented by Marc The Shark

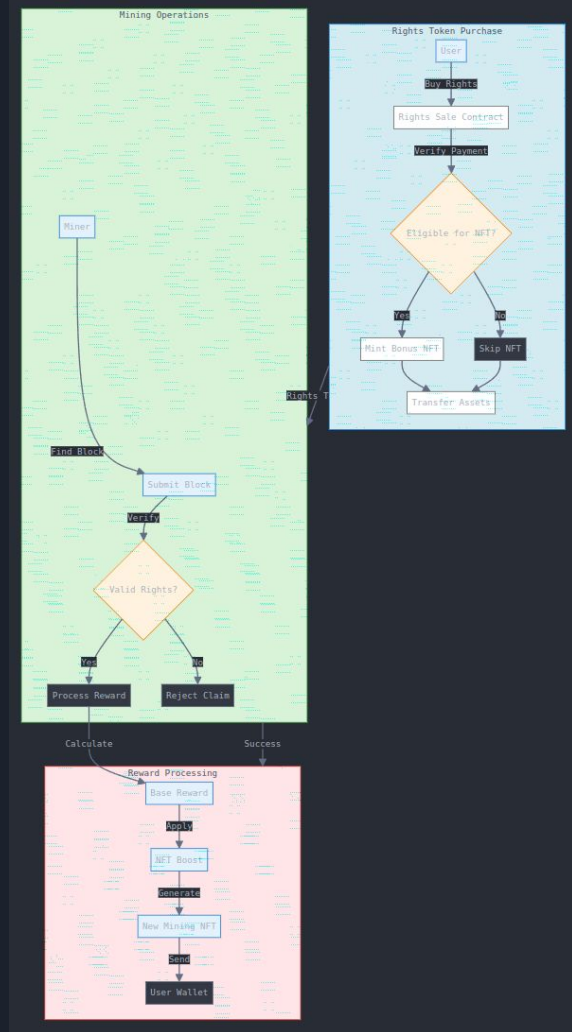

Mining Rights Protocol (MRP)

What is MRP?

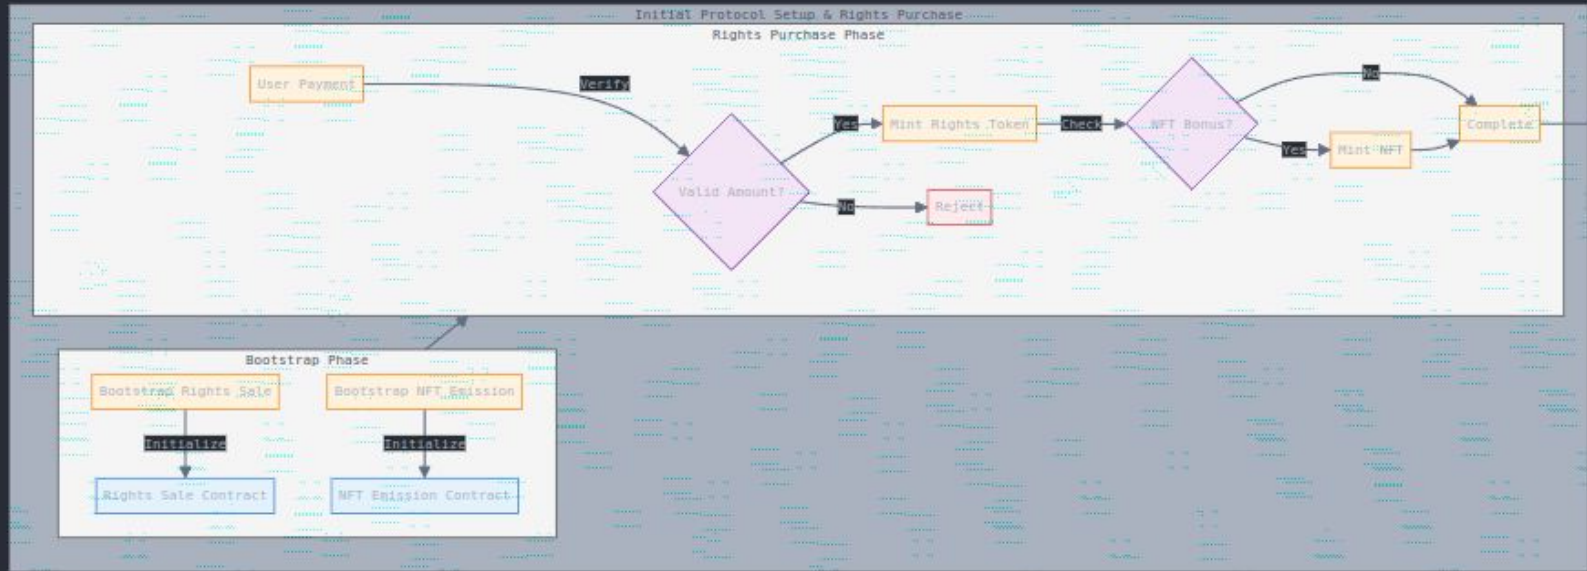

- A mineral rights-inspired system for blockchain mining
- Rights-based token distribution mechanism
- NFT-enhanced mining privileges
- Sustainable token emission protocol

Key Benefits

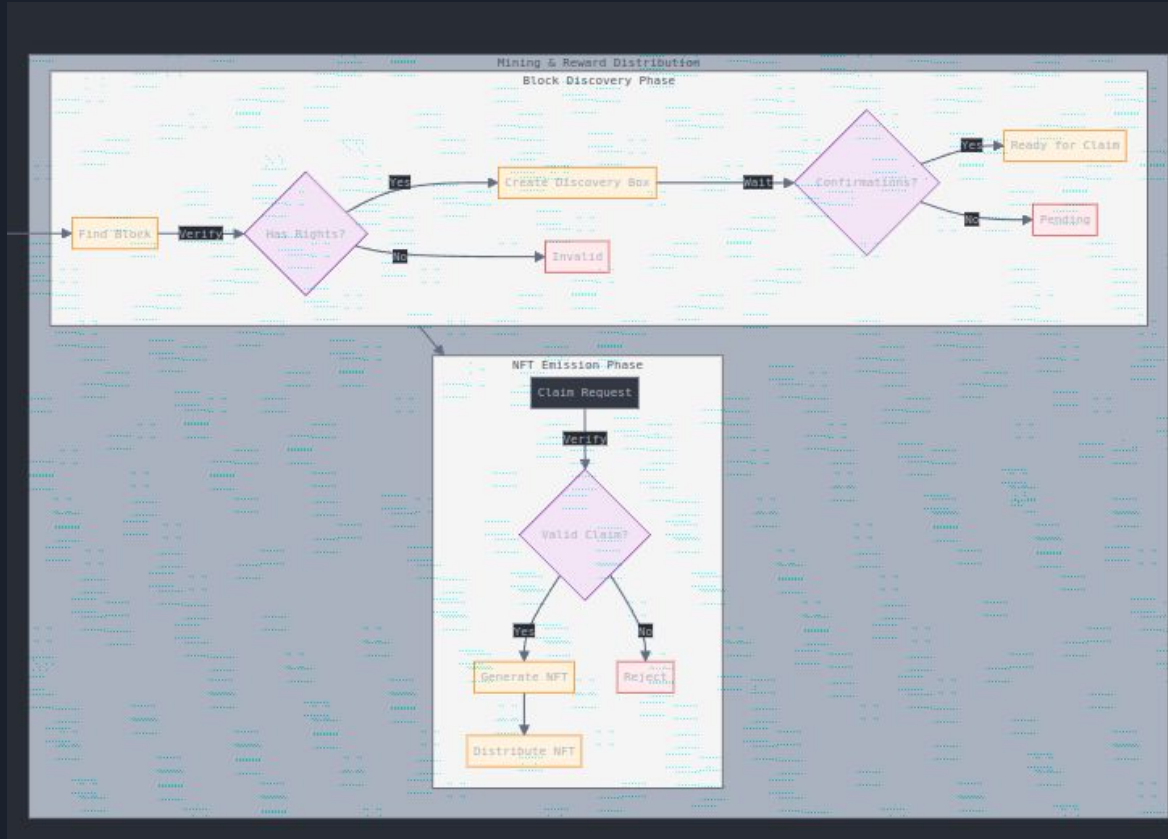

- Structured mining rights system
- Enhanced miner engagement through NFTs
- Sustainable token distribution
- Fair launch mechanism

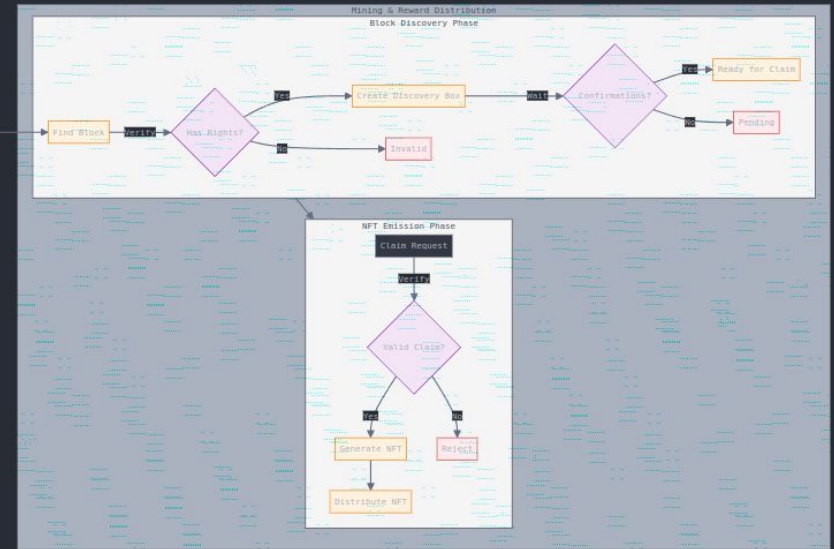

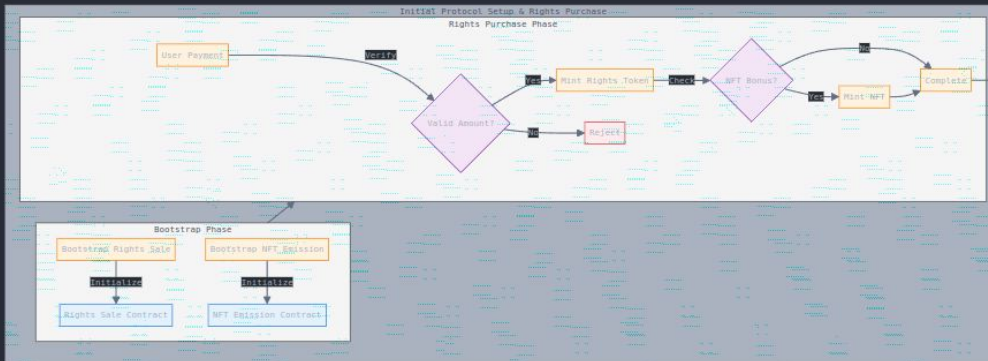

Action Flow

Action Flow

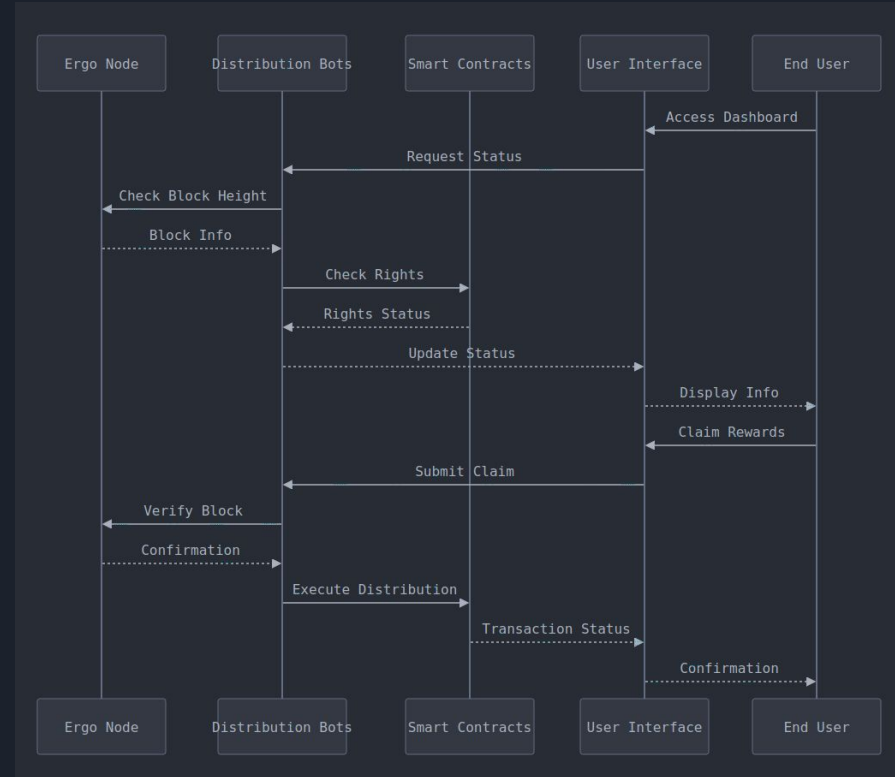

Action Flow

Technical Requirements

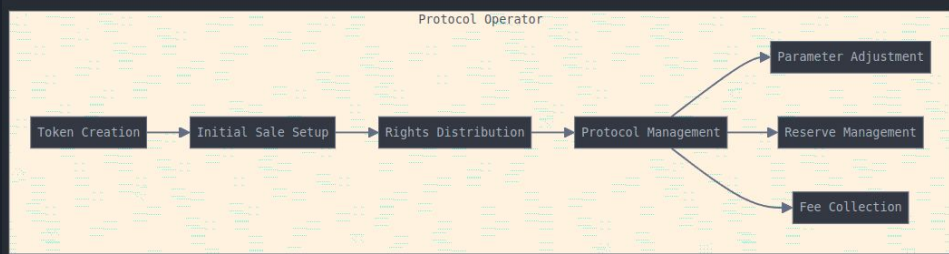

1. Infrastructure
 - Ergo Node
 - Distribution Bots
 - Monitoring Systems
2. Smart Contracts
 - Rights Sale Contract
 - NFT Minting Contract
 - Distribution Contract
3. User Interface
 - Rights Management Dashboard
 - Claim Interface
 - NFT Showcase

Protocol Operator Perspective

Token Creation & Setup

1. Initial Parameters
 - Total Rights Tokens: 10,000
 - Initial Sale: 7,500
 - Protocol Reserve: 2,500
2. Economic Structure
 - Base Price: 2 ERG per Right
 - Tiered Discounts
 - NFT Bonus System
3. Management Tools
 - Parameter Adjustment Interface
 - Reserve Management Dashboard
 - Fee Collection System

Required Initial Funding: 2.005 ERG

Rights Holder Experience

Participation Flow

1. Purchase Rights
 - Minimum: 1 Token
 - Maximum: 500 Tokens
 - NFT Bonus Thresholds
2. Mining Operations
 - Block Discovery
 - Reward Claims
 - NFT Collection
3. Benefits Structure
 - Base Mining Rights
 - NFT Boosts
 - Staking Options

Automation & Operations

Bot Infrastructure

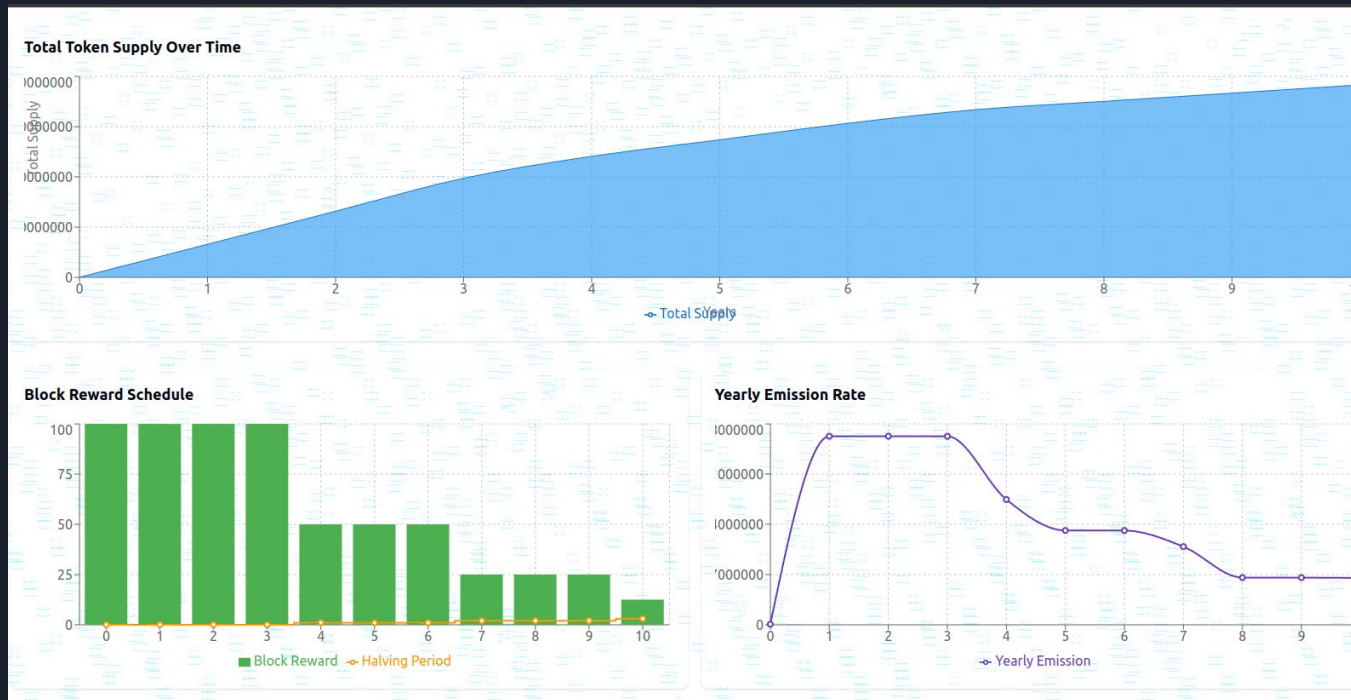

1. Block Monitoring
 - Real-time block scanning
 - Rights verification
 - Reward calculation
2. Distribution System
 - Automated payments
 - NFT minting
 - Transaction management

Sample Launch Plan & Metrics

Initial Release

1. Testnet Phase
 - Duration: 1 month
 - Participants: 100-200
 - Success Metrics
2. Mainnet Launch
 - Target Date: Q2 2024
 - Initial Supply: 10M tokens
 - Distribution Period: 3.33 years
3. Economic Projections
 - Year 1: 26.28M tokens
 - First Halving (3.33 years): 87.51M tokens
 - Token Velocity Estimates

Future Development

Roadmap

1. Phase 1: Basic Rights System
2. Phase 2: NFT Integration
3. Phase 3: Advanced Features
 - Staking
 - Extended Utilities

Community Integration

- Mining Pool Partnerships
- Developer Tools
- Community Governance for launched tokens
